🔗 [Portfolio](#)

Full Stack Web Developer with nearly 1 year of hands-on experience in a product-based environment, building and deploying scalable web applications using the MERN stack. Skilled in designing and consuming RESTful APIs, integrating frontend and backend systems, and managing state using modern tools like Redux Toolkit. Experienced in working in Agile teams, contributing to end-to-end feature development, and ensuring performance, scalability, and clean architecture.

📁 Experience

Full stack developer, Kuvi Networks

03/2025 – 02/2026

- Developed and maintained scalable full-stack applications in a product-based environment, contributing across the entire software development lifecycle from requirement analysis to production deployment.
- Took complete ownership of the **Store feature**, managing both host (seller/admin) and client (customer) workflows, ensuring seamless coordination between frontend and backend systems.
- Built dynamic, reusable frontend components using React and TypeScript, ensuring modular, scalable, and maintainable architecture.
- Managed complex global state (cart, checkout, order lifecycle) using **Redux Toolkit**, implementing structured loading, success, and error handling for predictable state transitions. Integrated **Formik** for efficient form management and validation.
- Designed and implemented host-side functionalities allowing product owners to create, update, manage product listings, pricing, inventory, and availability with proper validation and error handling.
- Developed customer-facing features enabling users to browse products, add/remove items from cart, manage orders, and complete payment workflows smoothly.
- Designed and developed secure and scalable **RESTful APIs**, implementing request validation and response serialization to ensure consistent and frontend-friendly data structures.
- Refactored backend services to align with evolving data models during database migrations, ensuring backward compatibility and data integrity.
- Handled API integration between frontend and backend using structured async workflows, ensuring smooth error handling and reliable data synchronization.
- Identified, debugged, and resolved production issues by analyzing logs and performance metrics, significantly improving application stability and user experience.
- Actively participated in code reviews, followed best coding practices, and contributed to building reusable modules to enhance long-term maintainability and scalability.
- Supported deployment and release cycles, ensuring high-quality rollouts with minimal production issues.

🎓 Education

Full Stack Development Course, Masai School

10/2025 – 03/2026 | Bangalore

Bachelor of Computer Applications, Don Bosco College, Mannuthy

2020 – 2023 | Thrissur Kerala

🧠 Skills

Frontend: JavaScript (ES6+), TypeScript, React.js, Redux Toolkit, Formik, BrightScript (Roku), HTML5, CSS3

Backend: Node.js, Express.js, RESTful API Development, Request Validation, Response Serialization

Tools Dev Practices: Git, GitHub, Version Control, VS Code, Debugging, Code Reviews

📁 Projects

Medication Management Application, MERN Stack

[Demo](#) 🔗 [GitHub](#) 🔗

- Built a full-stack medication management platform using React, Node.js, Express, and MongoDB
- Implemented CRUD operations through REST APIs
- Performed testing and debugging to ensure application reliability
