

Karthik K *Full Stack Web Developer*

✉ karthikkarunakaran444@gmail.com ☎ +91 8606643996 📍 Thrissur, Kerala [in LinkedIn](#) [GitHub](#)

🔗 [Portfolio](#)

Full Stack Developer with 11 months of experience building scalable web applications in a product-based environment. Skilled in the **MERN stack** and **TypeScript**, with hands-on experience delivering **end-to-end features**, designing **RESTful APIs**, and managing complex application state using **Redux Toolkit**. Demonstrated ability to improve **application performance**, maintain **data integrity**, and ship **production-ready solutions** in Agile teams.

Experience

Full stack developer, Kuvi Networks03/2025 – 02/2026

- **Owned and delivered** a full-scale **Store module**, enabling multi-user workflows for sellers and customers, improving overall usability and transaction flow.
- Built **dynamic, reusable frontend components** using **React and TypeScript**, ensuring a **modular, scalable, and maintainable architecture**.
- Designed and implemented **scalable state management** using **Redux Toolkit**, improving UI consistency and reducing state-related issues.
- Developed and maintained multiple **RESTful APIs** using **Node.js and Express**, implementing full **CRUD operations** to support application requirements and ensure reliable data flow.
- Led **backend refactoring during database migration**, ensuring **zero data loss** and seamless transition to updated data models.
- Diagnosed and resolved **production-level performance bottlenecks** through log analysis and monitoring, improving application reliability.
- Reduced form complexity by integrating **Formik**, simplifying form state management and validation logic, which minimized repetitive code and improved data accuracy.
- Actively contributed to **Agile development cycles**, including **code reviews**, sprint planning, and full **SDLC ownership**.

Education

Full Stack Development Course, Masai School10/2024 – 03/2025 | Bangalore

Bachelor of Computer Applications, Don Bosco College, Mannuthy2020 – 2023 | Thrissur Kerala

Skills

Frontend: JavaScript (ES6+), **TypeScript**, **React.js**, **Redux Toolkit**, **Formik**, **HTML5**, **CSS3**.
Backend: **Node.js**, **Express.js**, **MongoDB**, **RESTful API Development**, **Mongoose**, Request Validation.
Tools Dev Practices: **Git**, **GitHub**, **Version Control**, **VS Code**, **Debugging**, **Code Reviews**, **Agile/Scrum**.

Projects

Skill Sphere, MERN Stack
[Demo](#) [GitHub](#)

- Developed a **full-stack career platform** with **end-to-end TypeScript integration**, improving type safety and reducing runtime errors.
- Designed and managed **complex global state** using **Redux Toolkit (Slice architecture)** for handling user data and async API flows.
- Built **secure authentication and authorization** using **JWT**, with protected routes and session handling.
- Optimized backend performance with structured **MongoDB schema design and query handling**.

Medication Management App, MERN Stack
[Demo](#) [GitHub](#)

- Built a **healthcare-focused web application** using **React, Node.js, and Express** for managing medication records.
- Implemented **CRUD operations via REST APIs**, ensuring structured data flow between client and server.
- Performed **testing and debugging**, improving application stability and reducing runtime issues.
