Karthik K *Full Stack Web Developer*

karthikkarunakaran444@gmail.com +91 8606643996 Thrissur, Kerala LinkedIn GitHub

Portfolio

Full Stack Developer with over a year of production experience across product SaaS and client delivery, building with React, Next.js, TypeScript, Node.js and PostgreSQL. Currently building a multi-role Vendor Admin portal (8 product epics) with English/Arabic localization at Codenzic. Previously shipped the Guidebook and Store modules, 20+ REST APIs and Roku TV apps for a hospitality SaaS platform during ~840% MRR growth. Comfortable owning features end to end, from database migrations to pixel-accurate UI built from Figma.

Experience

Frontend Developer, Codenzic 08/2026 – Present | Kochi, Kerala

Vendor Admin Portal (Service Management Platform)

- Delivered the Vendor Admin portal for a service-management platform end to end in 1 months, giving vendor admins one place to onboard their business and manage technicians, fleet, rate cards, services, coverage, work orders and scheduling across 8 product epics; presented it to the client and completed the handover.
- Integrated REST APIs for vendor profile, settings and rate card workflows (create, history, resubmit) through typed TypeScript service layers.
- Implemented English/Arabic internationalization (i18n) across the product portal and company website, including a shared translation structure and language switcher.
- Rebuilt the company website's services, projects, blog and FAQ pages, and built the UI for a WhatsApp bulk-messaging tool.

Full stack developer, Kuvi Networks 03/2025 – 02/2026

- **WelcomeScreen (Hospitality SaaS Platform)**
- Developed, deployed, and maintained end-to-end full-stack applications using React.js, Node.js, and PostgreSQL, managing the complete software development lifecycle from implementation to production deployment.
- Engineered full-stack features for the Guidebook and Store modules, streamlining self-service guest information and reducing guest support requests.
- Built a dynamic Guidebook system enabling hosts to manage and publish real-time guest information, including check-in instructions and local recommendations, achieving adoption across all onboarded host accounts.
- Designed and maintained 20+ RESTful APIs using Node.js and Express with full CRUD operations, input validation, authentication, and centralized error handling to ensure reliable data flow across services.
- Contributed to product development during a period of approximately 840% MRR growth and 600% user growth, supporting the platform's rapid scale.
- Developed Roku TV app templates using BrightScript and XML, integrating backend APIs to deliver branded in-room guest experiences with real-time content on Roku devices.

Education

Full Stack Development Course, Masai School 10/2024 – 03/2025 | Bangalore

Bachelor of Computer Applications, Don Bosco College, Mannuthy 2020 – 2023 | Thrissur Kerala

Skills

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, HTML5, CSS3, SASS, Formik, Webpack

Backend: Node.js, Express.js, RESTful APIs, PostgreSQL, MongoDB, Mongoose, TypeORM, GraphQL (basic)

Practices: Agile/Scrum, code reviews, database migrations, API validation, MVC

Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), Docker (basic), AWS S3/EC2 (basic), Postman, ClickUp, VS Code

Projects

Skill Sphere, MERN Stack

Demo GitHub

- Built a full-stack career development platform with end-to-end TypeScript, sharing typed API contracts between client and server to catch errors at compile time.
- Designed global state management with Redux Toolkit (slice architecture) for user data, async API flows and session handling across 10+ modules.
- Deployed to Vercel with a cloud-hosted API and optimized response times.
